

# Employee engagement measurement software + insights delivered by humans

## WE'RE DIFFERENT.

The thing that makes Emplify truly unique (and what our customers love most) is that we don't just hand you a bunch of data and send you on your way. We pair you with an employee engagement strategist — a **trusted advisor to guide you along your journey**. Your strategist walks you through your organization's employee engagement metrics and helps you create a customized roadmap to improve communication and drive performance.

Employee engagement data you can trust

A strategist to guide you

We're industry leaders.  
Our customers value the data *and* delivery.

“ *Engagement product that's actually helping us understand our employees!* ”

This product is very easy to roll out and the information it pulls in is very specific and valuable. But, to me, the real value is our Emplify partner who walks us through the results, helps us understand what our employees are saying, and gives us recommendations. - G2 Crowd reviewer

## OUR METHODOLOGY IS PROVEN.

Emplify's employee engagement measurement software and team of expert strategists help you make sense of the many dynamics at play in your workforce — **so you can make more informed people decisions and improve business results.**

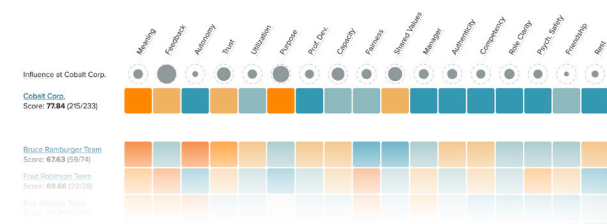

### Measure what matters.

While other solutions only look at employee *satisfaction*, Emplify gives you insight into true employee *engagement*. We do this by measuring the presence of 17 underlying drivers of engagement, such as authenticity, trust, autonomy, and utilization.

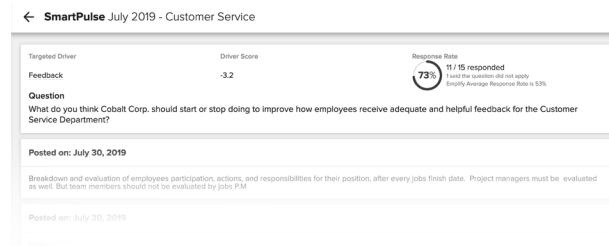

### Slice-and-dice the data.

Our intuitive heatmaps help you visualize employee engagement in your organization and allow you to view your data by department, manager, generation, location, and more. See where your teams are excelling and where more work is needed, at a glance.

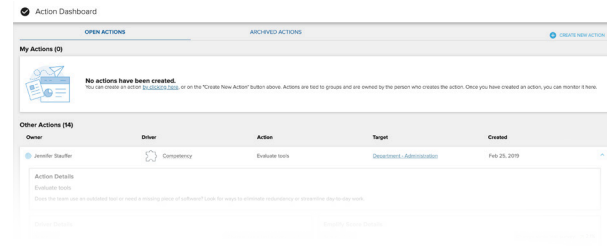

### Dig deeper on important issues.

Emplify's SmartPulse™ technology allows you to confidentially ask open-ended follow-up questions that are framed within the context of your company's quantitative survey results. These questions are tailored for specific groups to get to the heart of the real issues and formulate strategies to make a difference.

### Take action and get results.

Measuring engagement is just the first step. Your strategist will help you understand the state of engagement in your organization and work with you to strategize next steps. Together, you'll build an action plan for driving high engagement and performance — impacting your bottom line and your ability to compete and win.

To improve engagement,  
let's schedule a meeting to see how we can help.
